DATA PRIVACY AND COMPUTATIONAL INTEGRITY ACT

1. Mandatory Local Processing Standard
Any software system processing user files within this jurisdiction shall adhere to:
1. Local storage of all document streams without external telemetry;
2. Immediate in-memory cryptographic verification of file bounds;
3. Prohibition of automatic network transmissions of document contents;
4. Explicit user consent prior to external model pack installations.

2. Penalties and Enforcement
Failure to adhere to the requirements of Section 1 shall incur statutory penalties.

3. Scope of Exemptions
The provisions of this Act shall apply equally to desktop and embedded workflows.

4. Audit and Compliance
Entities shall maintain offline reproducibility records for all benchmark assertions.

5. Technical Governance
All computational units must maintain strict heap boundaries under 250 MiB.

6. Final Enactment
This Act shall take effect immediately upon signature by the presiding officer.
